

ENVIRONMENTAL POLICY STATEMENT

The Company is committed to compliance with all applicable environmental laws and to act responsibly toward the environment. It recognizes its responsibility to ensure its activities are not detrimental to the environment now or for future generations.

The company's activities in warehousing, distribution, re-sizing and machining of plastic components mainly generates waste materials and includes the limited use of substances such as machine oils.

As part of normal working practices, it is the responsibility of all managers to ensure their departments comply with environmental legislation pertinent to their activities. This is particularly important for the production, warehousing and maintenance departments.

In addition to ensuring compliance with current environmental and Health and Safety requirements for all our products or material used, the management team is taking positive steps to:

- Reduce the amount of waste material generated.
- Recycle waste material eg. offcuts, swarf.
- Recycle packaging.
- Use environmentally friendly alternatives where reasonably practicable.
- Assess the requirements and implications of new legislation.
- Avoid materials considered Ozone – depleting.
- Avoid substances listed in RoHS regulations
- Encourage employee suggestions of improvement

This is in accordance with the ENSINGER Group Ltd policy. All materials purchased from our associate companies are produced and supplied in accordance with the environmental legislation existing in the country of origin, namely Germany, USA and Italy.

Any expansion of ENSINGER Group Ltd or additions to its range of activities will include an assessment of environmental implications and will be in accordance with best practice.
